

## CAVITY WALL INSULATION (CWI) FAQ'S

### WHAT IS CAVITY WALL INSULATION?

Cavity wall insulation fills the gap between the inner and outer walls of your home to reduce heat loss.

### WHY IS MY HOME SUITABLE FOR CAVITY WALL INSULATION?

A survey has confirmed your property has suitable cavity walls that can be insulated safely and effectively.

### HOW IS IT INSTALLED?

Small holes are drilled into the external walls, insulation is injected into the cavity, and the holes are then filled and made good.

### HOW LONG DOES INSTALLATION TAKE?

Most installations are completed within a day.

### WILL I NEED TO MOVE FURNITURE?

Usually no, as most work is carried out from outside the property.

### WILL IT MAKE MY HOME WARMER?

Yes, cavity wall insulation helps retain heat and can improve comfort throughout your home.

### WILL THERE BE MUCH MESS?

Disruption is minimal and any dust or debris will be cleaned up before we leave.

### CAN I STAY AT HOME DURING THE WORKS?

Yes, you can remain at home throughout the installation.

### WILL IT HELP REDUCE CONDENSATION?

It can help reduce cold spots on walls, which may reduce condensation.

### DOES CAVITY WALL INSULATION NEED MAINTENANCE?

No, once installed it generally requires no ongoing maintenance.
