

THE BROAD OAK GROUP GUIDE TO EXTERNAL WALL INSULATION

A SMART WAY TO IMPROVE COMFORT, APPEARANCE AND ENERGY EFFICIENCY

What is it?

External Wall Insulation (EWI) is fitted to the outside of your home and covered with a protective render finish. It helps keep heat inside your property, improves energy efficiency and can enhance the appearance of your home.

If you have any questions or need to report an issue:

Why it's good for you

Keeps your home warm

Creates a thermal barrier around your property to reduce heat loss.

Reduces energy bills

Improves the efficiency of your heating system by keeping warmth inside.

Improves the appearance of your home

Provides a new external finish that can refresh and modernise your property.

Helps prevent damp and condensation

Keeps internal wall surfaces warmer, helping to reduce condensation risks.

Good for the environment

Reduces energy consumption and lowers carbon emissions.

EXTERNAL WALL INSULATION

WHAT YOU'LL NOTICE DAY TO DAY

-  Your home stays warmer for longer during colder weather.
-  Rooms feel more comfortable with fewer cold walls and draughts.
-  The external appearance of your home will have a refreshed finish.

TOP TIPS FOR LOOKING AFTER YOUR LOFT

-  Avoid attaching items to external walls without seeking advice first.
-  Keep air vents and ventilation openings clear.
-  Report any cracks, impact damage or concerns to the Customer Care Team.
