

INTERNAL WALL INSULATION (IWI) FAQ'S

WHAT IS INTERNAL WALL INSULATION?

Insulation boards are fitted to the inside of external walls to reduce heat loss.

WHY IS IT BEING INSTALLED IN MY HOME?

Your property may have solid walls which cannot be insulated using cavity wall insulation.

HOW MUCH WARMER WILL MY HOME FEEL?

Rooms should feel warmer and more comfortable, particularly during colder months.

WILL MY ROOM SIZES CHANGE?

The insulated walls will be slightly thicker, reducing room dimensions by a small amount.

WILL I NEED TO MOVE FURNITURE?

Yes, furniture and belongings may need to be moved away from walls being treated.

HOW LONG WILL THE WORK TAKE?

This depends on the size of the property but is typically around a week.

WILL I BE ABLE TO STAY AT HOME?

Yes, although access to certain rooms may be restricted while work is taking place.

WILL ELECTRICAL SOCKETS AND RADIATORS BE MOVED?

Where required, fittings may be adjusted and reinstated as part of the works.

WILL THE WALLS NEED DECORATING AFTERWARDS?

The new wall surface will be finished ready for decoration

WILL IT HELP LOWER ENERGY BILLS?

It may help reduce heat loss and improve the efficiency of your heating system.
