

## LOFT INSULATION FAQ'S

### WHAT IS LOFT INSULATION?

Loft insulation is installed within your roof space to reduce heat escaping through the roof.

### WHY IS LOFT INSULATION IMPORTANT?

A significant amount of heat can be lost through an uninsulated roof.

### HOW LONG DOES INSTALLATION TAKE?

Most installations are completed within a day.

### DO I NEED TO EMPTY MY LOFT?

Some loft clearance may be required before installation.

### CAN I STILL USE MY LOFT AFTERWARDS?

Yes, although storage arrangements may need to be adjusted.

### WILL MY LOFT HATCH BE UPGRADED?

Where required, loft hatches may be insulated or draught-proofed.

### WILL MY HOME FEEL WARMER?

Yes, loft insulation helps retain heat within the home.

### DOES LOFT INSULATION HELP IN SUMMER?

Yes, it can also help reduce heat entering the home during warmer weather.

### WILL THERE BE ANY DISRUPTION?

Disruption is generally minimal and limited to access requirements.

### HOW LONG DOES LOFT INSULATION LAST?

It is designed to provide long-term thermal performance.
